Country: **Mexico**

Titel of the project: **CAMPAIGN FOR THE EARLY DETECTION OF ATRIAL FIBRILLATION**

Project details

Eduardo Reyes Hidalgo

Award amount: €100,000

In order to achieve early detection of atrial fibrillation, authorization must be obtained from the relevant authorities for inter-institutional links among the various health centers and for the care of elderly patients

The relevant authorities must give their consent. Teams of 2 students in the tenth quarter of their university medical studies will be formed, supported by 2 nurses in the last quarter of their studies. They will visit health institutions, kindergartens, shelters, emergency rooms and intensive therapy units, where these patients will be detected. Patients will undergo a general clinical evaluation and have their heart rate and blood pressure checked, electrocardiographical records assessed and receive information on the risks of arrhythmia, and be sensitized to giving it the proper monitoring and attention.

Audience

Type

- AF Patients
- Healthcare professionals
- Carers of AF Patients
- General public

Location

Mexico, North America
