Country: **Mexico**

Titel of the project: **SOMEEC in education on the prevention of embolisms in AF  
and National AF Registers.**

## Project details

### **Jorge Rafael Gómez Flores**

Sociedad Mexicana de Electrofisiología y Estimulación Cardíaca

Award amount: €100,000

Let us take a look at 2 joint projects: EDUCATION: Conferences and regional meetings for GPs, doctors specialising in internal medicine and cardiologists. Drawing up Mexican clinical practice guides to manage AF and prevent embolisms. 2. NATIONAL AF REGISTER.

The Mexican Electrophysiology and Cardiac Stimulation Society is made up of electrophysiologists, opinion leaders and experts on managing atrial fibrillation. Now let us look at 2 joint projects: 1. - EDUCATION: 1. 1 CONFERENCES AND REGIONAL MEETINGS. Through the organisation of national conferences and regional meetings for GPs, doctors specialising in internal medicine and cardiologists on the management of AF and the prevention of embolisms. 1. 2 CLINICAL PRACTICE GUIDES. Drawing up Mexican clinical practice guides on the management of atrial fibrillation and the prevention of embolisms, which may be published as a supplement to the Mexican Cardiology Archives magazine to guarantee their dissemination. 1. 3 WEBSITE. At the moment SOMEEC's website is [www.someec.com](http://www.someec.com) which can be altered to provide information for doctors and patients, mainly focussed on managing oral anticoagulation with oral anticoagulants or dabigatran and controlling frequency and rhythm. The website will also provide a national list of certified electrophysiologists who are recognised as experts on managing atrial fibrillation. 2. NATIONAL ATRIAL FIBRILLATION REGISTER. 2. 1 Start the national electronic atrial fibrillation register aimed at raising awareness of the current management of AF in this country, as well as its prevalence and complications in order to focus on measures which will improve the quality of AF treatment. The register will include access to all doctors involved in the treatment of patients with AF. 2. 2 A national register of atrial fibrillation ablations will be created which will provide valuable information in order to make progress in the interventional management of this pathology.

## **Audience**

### **Type**

- AF Patients
- Healthcare professionals
- Carers of AF Patients
- General public

### **Location**

Mexico, North America
